

The StrongArm™ Dock Lip Barrier offers a security line of defense at the loading dock.

The StrongArm™ Dock Lip Barrier is your line of defense to prevent accidental forklift roll-off when the overhead door is open and no trailer is stationed at the dock.

When in the stored position, the StrongArm™ Dock Lip Barrier extends 5" above the cross traffic position providing an active, full dock width solid steel barrier.

When the dock is being used or the lip is in the extended working position, the lip remains flush or level with the deck plate providing smooth, unobstructed transition for materials loading or unloading. Also included are the means of lowering the lip below level dock operations.

The StrongArm™ Dock Lip Barrier is designed to withstand up to 15,000lb load impact at 5mph. The solid high tensile one piece steel lip plus 1" diameter lip hinge pin provides additional structural integrity for continued product performance and longevity.

Available on all "A" Series and "U" Series hydraulic dock leveler models with as well as the Air Cylinder (ACU) dock leveler.

There are many dock safety choices, all under the Blue Giant® name. Ask for the StrongArm™ Series of dock safety products, today!

Blue Giant® Advantage

- 5" high dock lip barrier
- Heavy-duty solid steel deck construction and 4" maintained deck tilt (A-Series docks) or deck flex (U-Series docks)
- Fully hydraulic operation
- Full operating range toe guard protection
- Two laminated bumpers
